## **The Elements of Statistical Learning: Data Mining**

Data mining is the process of discovering patterns in large data sets involving methods at the intersection of machine learning, statistics, and database systems. Data mining is an interdisciplinary subfield of computer science and statistics with an overall goal to extract information (with intelligent methods) from a data set and transform the information into a comprehensible structure for ...

## **Data mining - Wikipedia**

Statistics is a branch of mathematics dealing with data collection, organization, analysis, interpretation and presentation. In applying statistics to, for example, a scientific, industrial, or social problem, it is conventional to begin with a statistical population or a statistical model process to be studied. Populations can be diverse topics such as "all people living in a country" or ...

Business profit jumps in financial year 2016/17 Some good news in trying times. After two consecutive years of decline, South African businesses recorded a 49% increase in net profit before tax in financial 2017,

according to Stats SA's latest Annual financial statistics (AFS) survey. The mining industry was the largest contributor to this rise.
